

PROJECT BUNIYAAD 1.0

We at Ahlcon, believe in devising a comprehensive remediation plan focusing on improving both academic and behavioral outcomes for the targeted students. With an overview to provide support to this focus group of students, Middle Section of Ahlcon International School has identified strategies for intervention to monitor the learning curve of these students through a pilot project named '**BUNIYAAD 1.0**'.

Twenty students from Middle Section were enrolled in this Pilot **Project Buniyaad 1.0**. This programme is initiated in collaboration with Mr. **Amit (Senior Consultant-Shabda-Risk Assessment and Consultancy Services)** and Ms. **Nutan (Counsellor and Instructor)**. The project consists of administering three doses:

- **Booster 1** for the preliminary stage,
- **Booster 2** for the children who had qualified Booster 1
- **Booster 3** for the final and advanced stage.

The project started with Booster 1 strategy in the month of November 2016 comprising of five classes for one hour per week during the zero period till March 2017 in Mathematics, Science and English subjects. It provided students with a set of academic goals tailored to their needs and assisted in improving the students conceptually thereby kindling their interest in these subjects.

The project targeted towards achieving short and long term for students and their parents. A noticeable improvement in the academic performance and overall behaviour of the students has been observed.

Mr. Amit had an interaction with the parents of these students on regular basis and discussed about the individual progress of each child. Shabda gave a detailed performance report to the parents after the completion of every cycle. This detailed feedback was a great eye opener for the parents and enabled them to provide adequate support to their wards.

Achievements

Booster 1 dose of Buniyaad1.0 has shown tangible improvement in some of the students during FA 4 and the ongoing SA 2 exam.

Feedback of Teachers

Ms. Rashmi Upadhyay, Class Teacher of VIII-F – “Booster 1 dose of Buniyaad has been a dedicated endeavor to bring a rational change in the students. The project constantly worked for the students who needed behavioural correction. Through varied

activities it channelized the energies of students .It turned to be a bright opportunity for students”.

Ms. Harprit R. Manku Class teacher of VIII-C- The interventions have helped students to improve upon their focus, concentration and mental reasoning thereby leading to a better academic performance. The diagnostic tools used, helped in identifying the grey areas and in return devising some meaningful strategies to cater to the individual needs of the students.

Feedback of parents

- I am very happy to see the initiative of the school. It is the best platform to extract the right potential of each child. The sessions should continue as it has increased my child’s focus and concentration. **(Parent of Manish VI-F)**
- I was aware that some intervention was required for my child but was unable to figure out how to start. Each session of Buniyaad has improved my ward’s academic and non – academic performance and I am very happy about it. **(Parent of Wajeeh VII-C)**
